CEO Comments

"I am very pleased with our Q1 2015 operating results and, more generally, the Company's positioning after the first quarter of the year," said Joey Agree, President and Chief Executive Officer. "We have a strong pipeline of high-quality real estate investment opportunities and are making progress on a number of key strategic initiatives. We remain focused on executing our plan to scale the Company while maintaining a disciplined approach to real estate underwriting and balance sheet management."

Portfolio Update

As of March 31, 2015, the Company's portfolio consisted of 233 properties located in 39 states and totaling 4.7 million square feet of gross leasable space. Retail net lease properties contributed approximately 92.3% of annualized base rent, including 9.9% of which was generated from properties ground leased to tenants. The remaining rent was derived from community shopping centers.

The portfolio was approximately 98.6% leased, had a weighted average remaining lease term of approximately 11.8 years, and generated approximately 54.1% of annualized base rents from investment grade tenants.

The table below provides a summary of the Company's portfolio as of March 31, 2015:

- (1) Funds from Operations (“FFO”) is defined by the National Association of Real Estate Investment Trusts, Inc. (NAREIT) to mean net income computed in accordance with U.S. generally accepted accounting principles (GAAP), excluding gains (or losses) from sales of property, plus real estate related depreciation and amortization and any impairment charges on a depreciable real estate asset, and after adjustments for unconsolidated partnerships and joint ventures. Management uses FFO as a supplemental measure to conduct and evaluate the Company’s business because there are certain limitations associated with using GAAP net income by itself as the primary measure of the Company’s operating performance. Historical cost accounting for real estate assets in accordance with GAAP implicitly assumes that the value of real estate assets diminishes predictably over time. Since real estate values instead have historically risen or fallen with market conditions, management believes that the presentation of operating results for real estate companies that use historical cost accounting is insufficient by itself.

FFO should not be considered as an alternative to net income as the primary indicator of the Company’s operating performance, or as an alternative to cash flow as a measure of liquidity. Further, while the Company adheres to the NAREIT definition of FFO, its presentation of FFO is not necessarily comparable to similarly titled measures of other REITs due to the fact that all REITs may not use the same definition.

Adjusted Funds from Operations (“AFFO”) is a non-GAAP financial measure of operating performance used by many companies in the REIT industry. AFFO further adjusts FFO for certain non-cash items that reduce or increase net income in accordance with GAAP and for non-recurring items that are not reflective of ongoing operations. Management considers AFFO a useful supplemental measure of the Company’s performance, however, AFFO should not be considered an alternative to net income as an indication of the Company’s performance, or to cash flow as a measure of liquidity or ability to make distributions. The Company’s computation of AFFO may differ from the methodology for calculating AFFO used by other equity REITs, and therefore may not be comparable to such other REITs. Note that, during the year ended December 31, 2014, the Company adjusted its calculation of AFFO to exclude non-recurring capitalized building improvements and to include non-real estate related depreciation and amortization. Management believes that these changes provide a more useful measure of operating performance in the context of AFFO.
