

## **Applications Engineer**

The Applications Engineer supports the business by ensuring the Application landscape is working at optimal performance and the functionality meets the capability requirements of each team. Working directly with the CIO, external systems, and application partners, the Applications Engineer will be involved in strategic and tactical planning to make the business run as efficiently as possible while supporting the day-to-day operations and managing Applications as required.

Additionally, the Applications Engineer will show a willingness to assist team members as needed with both hardware and software issues to ensure success across the office as needed. This role reports directly into the Chief Information Officer and will be on site in Royal Oak, MI.

## **What you will do:**

- Applications
  - In conjunction with our Managed Service Provider (MSP), provide support for our current Microsoft 365 platform, MRI ERP, as well as other key strategic systems including, but not limited to PipeDrive, Nexus and in-house built MySQL solutions
  - Help in translating business requirements into project specifications, design requirements documents, and perform impact analysis for application changes
  - Research tools to identify those that can best serve the needs of stakeholders
  - Understand and modify application configurations as required (including system configurations, data fields, workflows, custom libraries, profile options, etc.)
- Infrastructure
  - Support the maintenance of essential IT operations including operating systems, security tools, applications, email, etc. by partnering with our external MSP
  - Support / Administer Users/Groups, security permissions, group policies, print services, Azure, Intune, etc.
  - Support / Manage APIs to ensure interaction between systems is operating at peak efficiency and performance
- Additional Responsibilities
  - Interact with the MSP Help Desk and other systems teams to assist in troubleshooting, identifying root cause, and provide technical support when needed
  - Run diagnostics to resolve user reported issues
  - Support and perform routine/scheduled updates, backups, and audits of the systems, including yearly IT controls auditing

## **Who you are:**

- Bachelor's degree in technology or computer science
- 5+ years experience working in a Microsoft environment (OS / Applications / Security / M365)
- Microsoft Certified Systems Engineer designation preferred
- Experience with or knowledge of programming languages (Power BI (DAX), Python, SQL, etc.) and operating systems
- Knowledge of AI, Machine Learning and BI tools (Azure OpenAI, Azure Cognitive Services, Power BI, CoPilot, etc.)
- Knowledge of application administration including, but not limited to ERP, CRM, SharePoint, etc.

- Experience in application design and integration, API management and cloud computing (specifically Microsoft Azure)
- Excellent project management and oral communication skills
